

STRENGTH AND TRUST

INDUSTRY:

Oil & Gas

PROJECT TYPE:

Specialized Transportation

PROJECT OVERVIEW:

Omega Morgan successfully received permits to move 20 oversized condensate vessels through Alberta. Our skilled team engineered, designed and fabricated a custom tailing frame to assist with transport and limited space for crane at the project site. The tanks were received from two fabricators, transported, rigged and set to pad using an in-house engineered lift plan. For the duration of the eight-week project, 4 rigging crews and superintendents assisted with the offloading of all 20 tanks and all on-site crane work.

EQUIPMENT USED:

Manitowoc 2250 crane and 48-wheel Cozad trailer

PROJECT SPECS:

(20) Condensate vessels:
70,000 lbs;
55' 11.5" L x 27' 3" W x 28' 11" H

PROJECT:

CONDENSATE PLANT UPGRADE
