

PROJECT:

STORING & SETTING TWO AIR HANDLERS

INDUSTRY:

Construction

PROJECT TYPE:

Machinery Moving

PROJECT OVERVIEW:

With construction underway on a new, mixed-use office building in downtown Bellevue, Washington, the builders needed two large air handlers placed — a task that would require skilled heavy lift operators. Omega Morgan not only provided expert machinery moving services, but the complete solution by storing the air handlers in Fife prior to installation. Overcoming height restrictions and other challenges, the machinery moving team delivered a world-class solution.

EQUIPMENT USED:

350-ton crane and two truck trailers
