

PROJECT:

RELOCATING SPINDLE MACHINES

INDUSTRY:

Manufacturing

PROJECT TYPE:

Machinery Moving

PROJECT OVERVIEW:

Relocating to a facility in Lakewood, WA, a manufacturer needed a machinery moving team that could deliver expertise and flexibility over a long time period, without costing production value. Over a year and a half later, Omega Morgan has transported the majority of the components, including 115 spindle machines, while continuing to move one load a week as the job wraps up.

EQUIPMENT USED:

Forklifts: 15K, Hoist 40/60, and Versilift 60/80. Tractors: 3 and 4-axle trucks along with lowboy, step deck, and double drop trailers.
