

**PROJECT:**

# TUNNEL BORING MACHINE

**INDUSTRY:**

Heavy Civil

**PROJECT TYPE:**

Specialized Heavy Rigging  
& Transportation

**PROJECT OVERVIEW:**

Transported (3) TBM components from Husky Stadium to JCM Northlink's tunnel access site in downtown Seattle. All (3) hauls were made in (2) nights with limited hours using Omega Morgan's dual lane trailer. The trailer was equipped with modified low-profile rails to ensure clearance under the low trolley lines and pedestrian bridges.

- Frontbody: 21'6"D x 11'2"T - 212,000lbs
- Middlebody: 24'4"D x 13'1"T - 248,000lbs
- Rearbody: 21'4"D x 13'1"T - 112,000lbs

**EQUIPMENT USED:**

Dual lane trailer with low-profile rails
