

**PROJECT:**

# 158,000 POUND TRANSFORMER

**INDUSTRY:**  
Public Utilities

**PROJECT TYPE:**  
Specialized Heavy Rigging & Transportation

**PROJECT OVERVIEW:**  
Omega Morgan supported the Wildish Building Company when they took on a project to upgrade an existing powerhouse. Wildish Building Company needed to remove two transformers and then install two new larger transformers. The project also required the removal and replacement of a powerhouse deck, and, in order to comply with the limited deck loading, Omega Morgan had to design and build a runway to distribute a 158,000 pound transformer and slide gear system load to 500 PSF.

**EQUIPMENT USED:**  
20K warehouse forklifts, 8K 100 ton Dual Lane Loader trailer with (2) Tri-Tri tractors
